

EcoBlend®

SUSTAINABLE, ECO-FRIENDLY FIBER FOR A GREENER TOMORROW

EcoBlend® is a cost-effective, eco-friendly solution for nonwovens and cotton blends. Made from reclaimed cotton fibers, it offers sustainability without compromising performance. Ideal for various products, it reduces waste while ensuring value, quality, and safety.

ATTRIBUTES

- Uses fiber byproduct from post-industrial sources
- Diverts cotton from landfills, minimizing environmental impact
- Reduces the need for new raw materials
- Saves water and energy used in growing new cotton crops

RECOMMENDED PRODUCT APPLICATIONS

BABY CARE

CONSUMER & MEDICAL

WET & DRY WIPES

PERFORMANCE

High Absorbency - Superior absorbency compared to other natural fibers

High Wet Strength - Naturally becomes stronger when exposed to liquids

Free of Substances of Interest (SOIs) - Purification process ensures the removal of any SOIs

Bioburden - Minimal presence of bacteria, fungi, and other contaminants exceeding minimum industry standards
